Apex™ Pink Meadow Sage

Salvia nemorosa 'Apex Pink'

Plant Height: 6 inches

Flower Height: 12 inches

Spread: 14 inches

Spacing: 12 inches

Sunlight: ○

Hardiness Zone: 4a

Other Names: Perennial Salvia

Group/Class: Apex Series

Description:

A compact, bushy variety producing abundant spikes of long lasting pink flowers that begin early, and rebloom all summer, for extended garden color; dense, fragrant foliage; somewhat drought tolerant; excellent for sunny borders or containers

Ornamental Features

Apex Pink Meadow Sage has masses of beautiful spikes of pink flowers with burgundy calyces rising above the foliage from mid spring to mid fall, which are most effective when planted in groupings. The flowers are excellent for cutting. Its small fragrant narrow leaves remain grayish green in colour throughout the season.

Landscape Attributes

Apex Pink Meadow Sage is an herbaceous perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Apex Pink Meadow Sage is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Apex Pink Meadow Sage will grow to be only 6 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 14 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. This plant does not require much in the way of fertilizing once established. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Apex Pink Meadow Sage is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
